

**FOR IMMEDIATE RELEASE:**

**Apex® HCM Hires Industry Expert Kishore Masand**

**Roswell, GA. (April 30, 2018)** – Apex HCM, a leader in payroll, timekeeping, and human capital management services, announced the hiring of an industry leading payroll technologist, Kishore Masand as Vice President of Engineering. Masand joins Apex with over 20 years of experience developing technology for the payroll industry and previously led technology development for Heartland Payroll a division of Global Payments (NYSE:GPN). The addition of Masand marks yet another investment into the Apex product development team.

“Having worked two decades at Heartland and R.S. McGladrey I certainly learned a lot about the payroll business, new technologies, and industry trends. When I met with Apex executives I found people with deep industry experience who see the same opportunity to create radically innovative payroll technology that is easy to use and eliminates manual repetitive processes. I knew immediately that I wanted to join the Apex team.”

Robert Digby, Apex CEO, talks often about creating technology that is powerful, scalable and also the easiest to use in the industry. “Kishore’s deep payroll technology background will certainly accelerate our product development efforts. Kishore talks about creating products that are ‘Designed to Delight’. That philosophy really resonated with us.”

Masand will report to Apex Chief Technology Officer, Kevin Lenahan, who commented, “Over the past year we hired many engineers with experience in specific new technologies. Kishore brings a unique and insightful understanding of how new technologies can directly benefit payroll service bureaus and their clients.” Lenahan added that Apex plans to continue hiring software engineers and architects throughout 2018 and beyond.

The rapid hiring in software engineering staff stems from record growth in new customers choosing the Apex HCM platform as well as record growth in revenue from existing customers. Recent research documented that Apex customers continue to outperform payroll service bureaus in terms of revenue growth. Apex also published a research paper earlier this month titled, “How to Grow a Payroll Business” which identified four keys to growing a payroll service business.
