

FOR IMMEDIATE RELEASE:

Apex® HCM Announces Rollout of Employee Navigator® Integration

Roswell, GA. (March 29, 2019) – Apex HCM, a leader in payroll, timekeeping and human capital management technology today announced the rollout of a seamless product integration with employee benefits administration leader Employee Navigator. Both Apex HCM and Employee Navigator are each recognized as the fastest growing technology providers in their respective marketplaces. The combination of a cloud-based industry leading payroll and HCM platform with the industry leading benefits administration and HR platform creates a uniquely powerful offering for payroll service bureaus, insurance brokers, and employers.

The product rollout follows an extensive testing period with several major Apex HCM clients. Testing involved hundreds of employers for many months. Apex HCM CEO, Robert Digby commented, "Our customers have been well aware of the development and testing program with Employee Navigator and not surprisingly many people urged for a quick product release. But, we moved methodically through a rigorous and disciplined quality assurance process." Digby continued, "Our customers are on the leading edge of the payroll industry and they understand the value of an integrated benefits administration and enrollment platform."

George Reese, CEO, Employee Navigator highlighted the game changing opportunity this brings to payroll service bureaus. "We're thrilled to join forces with Apex to offer a real-time payroll and benefits integration. "This partnership enables our clients to experience a seamless data flow between Apex and Employee Navigator - resulting in reduced time on manual data entry, improved accuracy of data, reduced broker liability, and more. Now, employers are fully equipped to focus on their most valuable asset - their people."

Offering an integrated payroll and HR benefits administration platform also opens an entirely new market for payroll service bureaus, the insurance broker market. Marty Hamby, Apex HCM President, added, "Employee Navigator provides not only a great technology solution but also a great potential business growth opportunity for Apex payroll service bureaus."

Jacob Arnold, Director Operations, Genesis PPG, one of the beta clients testing the Employee Navigator integration, commented, "Genesis PPG seeks to help our clients save money in operating their businesses in the areas of merchant services, payroll services, and now benefits administration. The Apex HCM platform has been critical to our clients and the integration with Employee Navigator creates another growth opportunity for Genesis PPG."

Employee Navigator and Apex HCM aligning efforts follows current trends in the payroll industry. First, the trend of traditional payroll processing bureaus expanding their services offering via HCM services. Second, the trend of all-in-one platform integration to enable easy access to a wider suite of services for the bureau, the employer, and the employee all via one easy to access cloud-based platform. The Employee Navigator integration is immediately available to all Apex HCM payroll service bureau customers.

About Employee Navigator

Employee Navigator is one of the fastest growing SaaS-based benefits and HR platforms in the United States. The platform provides brokers and their clients with a single place to manage everything from new hire onboarding and online enrollments to ACA Reporting and time off tracking.
