

For Immediate Release:

Apex HCM Expands Tax Management Functionality to Support Local Taxes and Includes e-Filing as a Standard Feature

Apex Tax Management support includes e-Filing at no extra cost, local tax calculating and filing, and more.

Roswell, GA. (September 29, 2022) - Apex HCM, a leader in Human Capital Management Technology, has announced the expansion of its Tax Management functionality to support local taxes. Apex HCM is also offering e-Filing as a standard feature at no additional charge to customers. Apex tax professionals research and maintain state and federal tax rates, tax brackets and statutory limits so customers can concentrate on growing and running their payroll business. Apex is known for their all-in-one, configurable, HCM suite and unmatched personal service.

Apex Tax Management includes but is not limited to:

- **E-Filing:** Apex's e-Filing wizard enables users to quickly and proficiently generate federal forms 941 and 940 e-Files. All IRS acknowledgement data is stored directly within Apex for historical audit and reference. Apex is an approved IRS e-File provider: <https://www.irs.gov/e-file-providers/tax-year-2022-94x-modernized-e-file-mef-providers>.
- **Local tax support:** Apex maintains the local taxes table, removing this burden from our bureaus, in turn, saving customers time and effort.

"Apex has always differentiated ourselves from other HCM providers with our easiest to use, scalable, powerful and flexible platform," says Wes Muschara, VP of Product Management. "We can now add the fact that we include capabilities such as e-Filing as a standard feature whereas most providers charge up to a few thousand dollars to e-File, or do not offer this feature at all. We are also constantly tracking payroll and legislative changes to quickly develop innovative solutions to solve our customers' challenges to doing business."
